

2021 TCR TECHNICAL BULLETIN no. 03 / 2021-03-09

The following additions to the “2021 TCR technical Regulations” apply immediately.

Art. 4.1 Chassis

Unused holes or openings on the production body-shell that are placed in areas that are not leaked by the airstream and are not the subject of other articles of these regulations may be closed permanently or temporarily (welding, covers or tape).

Art. 4.5; Interior

The original heating & air condition systems may be removed. Bulk head openings must be closed respecting “fire-wall” conditions. (Certification)

Andreas Bellu / WSC Technical Director
